SUBJECT INDEX

Adrenal transplants, cervical, in the sheep, an improved method of preparing (Goding and Wright), 443.

Albumin synthesis *in vivo*, a micro-method for the study of (Thorpe), 639.

(S-(2-Amino ethyl) thiuronium bromide hydrobromide), a radio-protective drug, the effect of, upon the general and coronary haemodynamics and metabolism of the intact dog (Maxwell and Kneebone), 601.

Amoeba proteus, phagocytosis and killing of salmonellae by effects of opsonins on, and the use of phage P_{22} to eliminate surplus extracellular bacteria (Savanat and Pavillard), 625.

Amoeba proteus, the ability of, to kill *Salmonella enteritidis* introduced by micro-injection, and the influence of opsonins on intracellular killing (Savanat and Pavillard), 615.

Antigenicity, heterophile, the expression of, by Salmonellae (Collins and Rowley), 249.

Antigens in immunity

I. Preparation and properties of flagellar antigens from *Salmonella adelaide* (Ada, Nossal, Pye and Abbott), 267.

II. Immunogenic properties of flagella, polymerized flagellin and flagellin in the primary response (Nossal, Ada and Austin), 283.

Antigens in immunity

III. Distribution of iodinated antigens following injection into rats via the hind footpads (Ada, Nossal and Pye), 295.

IV. Cellular localization of ^{125}I- and ^{131}I-labelled flagella in lymph nodes (Nossal, Ada and Austin), 311.

Antigens in immunity

V. The ability of cells in lymphoid follicles to recognize foreignness (Ada, Nossal and Austin), 331.

Arbovirus, group A, investigations into the ecology of, in Westland, New Zealand (Ross, Miles, Austin and Maguire), 689.

Arboviruses, enhancement of the infectivity of, by specific antisera produced in domestic fowls (Hawkes), 465.

Arthropod-borne virus infections in Queensland, studies of

IV. Further serological investigations of antibodies to group B arboviruses in man and animals (Doherty, Carley and Gorman), 149.

Bacteria, certain gram-negative, the nature of the opsonins in adult hen serum and developing chick embryos to (Karthigasu, Jenkin and Turner), 499.

Bacteria, fast-growing acid-fast, phage patterns of the (Rodda), 457.

Bacteria, recoveries of, after drying in glutamate and other substances (Annear), 717.

Botulism, avian, in Western Australia (Grubb), 17.

Calcium depletion of cardiac muscle, the effects of, upon the relation between stimulus pattern and action potential, analysed in terms of a mathematical model (Gibbs), 116.

Candida albicans in oral pathological material, the application of the fluorescent antibody technique to the detection of (Schamschula), 173.

Cardiac muscle, the effects of calcium depletion of, upon the relation between stimulus pattern and action potential, analysed in terms of a mathematical model (Gibbs), 116.

Catecholamines, some actions of, on the smooth muscle of the guinea-pig vas deferens (Holman and Jowett), 40.

Cell wall composition of marine cytophaga (Collins), 263.

Cellular resistance, acquired, macrophage proliferation in relation to (Khoo and Mackaness), 707.

Cervical adrenal transplants in the sheep, an improved method of preparing (Goding and Wright), 443.

Cr^{51} labelled Ehrlich ascites tumour cells, the fate of (Vincent and Nicholls), 569.

Circulatory changes accompanying the contraction of voluntary muscle (Barcroft), 1.

Coagulation, induced, of heparinised blood. I. Active compounds (Fantl), 491.

Contraction of rabbit papillary muscle, a quantitative description of the short term changes in the force of, with the pattern of stimulation (Johnson, Rowe and Vaughan), 197.

Cytophaga, marine, cell wall composition of a (Collins), 263.

Diuresis, osmotic, and vasopressin, the effects of, upon the distribution of sodium, potassium and urea in the rat kidney (Cross), 523.

Diuresis, osmotic, due to creatinine loading, stop-flow analysis of renal tubular function in the rat undergoing (Young and Edwards), 667.

Dye-dilution curves in normal man, factors influencing the dispersion of indicator in (Thorburn), 543.

Ectromelia virus, attenuated, enhancement of the virulence of, in mice maintained in a cold environment (Roberts), 657.

Ehrlich ascites tumour cells, the fate of Cr^{51} labelled (Vincent and Nicholls), 569.

Enzyme changes in the plasma and peritoneal exudate of the rat following pancreatic duct obstruction (Herriott and Palmer), 27.

Ethyl alcohol, the effect of traumatic shock on metabolism of, in mice.
II. Changes in whole-body metabolism (Lykke and Kosche), 181.

Fluorescent antibody technique, the application of (the), to the detection of *Candida albicans* in oral pathological material (Schamschula), 173.

Folate activity, serum and liver, in the rat (Kelly and Davis), 209.

Folate activity, *Streptococcus lactis*, of human liver tissue, studies on the (Joske, Davis and Kelly), 74.

Glanzmann's disease, a morphological study of platelets in (Castaldi), 86.

Guanethidine, iontophoresis of, in man (de la Lande, Hodge, Reilly and Thomas), 81.

Haemodynamics, the general and coronary, and metabolism of the intact dog, the effect of a radio-protective drug (S-(2-amino ethyl) thiuronium bromide hydrobromide) upon (Maxwell and Kneebone), 601.

Haemoglobin H, purified, sedimentation and diffusion studies on (Curtain and Pye), 98.

Haemoglobins, abnormal, occurring in New Guinea, a structural study of (Curtain), 89.

Haemopexin and haptoglobin in the plasma of cattle, studies on (Bremner), 643.

Haptoglobin and haemopexin in the plasma of cattle, studies on (Bremner), 643.

Heparinised blood, induced coagulation of.
I. Active compounds (Fantl), 491.

Immunity, antigens in.
I. Preparation and properties of flagellar antigens from *Salmonella adelaide* (Ada, Nossal, Pye and Abbott), 267.
II. Immunogenic properties of flagella, polymerized flagellin and flagellin in the primary response (Nossal, Ada and Austin), 283.

Immunity, antigens in.
III. Distribution of iodinated antigens following injection into rats via the hind footpads (Ada, Nossal and Pye), 295.
IV. Cellular localization of ^{125}I- and ^{131}I-labelled flagella in lymph nodes (Nossal, Ada and Austin), 311.

Immunity, antigens in.
V. The ability of cells in lymphoid follicles to recognize foreignness (Ada, Nossal and Austin), 331.

Immunological reactions produced by the local injection of adult fowl leucocytes in chickens (Warner), 417.

Immunological role of different lymphoid organs in the chicken.
II. The immunological competence of thymic cell suspensions (Warner), 401.

Indicator, factors influencing the dispersion of in dye-dilution curves in normal man (Thorburn), 543.

Insulin and myeloschisis in the chick embryo (van Dongen), 607.

Iontophoresis of guanethidine in man (de la Lande, Hodge, Reilly and Thomas), 81.

Iron, milk and plasma iron, transport in a lactating marsupial during short-term intravenous infusion of iron (Kaldor and Ezekiel), 54.

Lactating marsupial, milk iron and plasma iron transport in a, during short-term intravenous infusion of iron (Kaldor and Ezekiel), 54.

Leptospiral infection, phagocytosis and its significance in (Faine, Shahar and Aronson), 579.

Leucocytes, adult fowl, immunological reactions produced by the local injection of, in chickens (Warner), 417.

Lipid, the synthesis of, from acetate-2-^{14}C in the isolated perfused normal and choline-deficient liver of the rat (Mishkel and Morris), 189.

Lipids, simple, effects of on the phagocytic properties of peritoneal macrophages.
II. Studies on the phagocytic potential of cell populations (Cooper and Houston), 429.

Lipids, simple, effects of on the phagocytic properties of peritoneal macrophages.
III. Micro-electrophoretic and biochemical studies on triolein-treated cells (Lee and Cooper), 725.

Lymphoid organs, different, in the chicken, the immunological role of.
II. The immunological competence of thymic cell suspensions (Warner), 401.

Lymphoma, radiogenic, indirect transfer of (Ilbery and Winn), 133.

Macrophage proliferation in relation to acquired cellular resistance (Khoo and Mackaness), 707.

Macrophages, peritoneal, effects of simple lipids on the phagocytic properties of.
II. Studies on the phagocytic potential of cell populations (Cooper and Houston), 429.

Macrophages, peritoneal, effects of simple lipids on the phagocytic properties of.
III. Micro-electrophoretic and biochemical studies on triolein-treated cells (Lee and Cooper), 725.

Mice, NZB/B1, observations on. Differential fertility in reciprocal crosses and the transmission of the auto-immune haemolytic anaemia to NZB/B1 x NZC/B1 hybrids (Bielschowsky and Bielschowsky), 561.

Mitotic cells of mice of different ages and strains, the effect of urethane on (Wakonig-Vaartaja), 165.

Muscle, smooth, of the guinea-pig vas deferens, some actions of catecholamines on the (Holman and Jowett), 40.

Muscle, voluntary, circulatory changes accompanying the contraction of (Barcroft), 1.

Myeloschisis and insulin in the chick embryo (van Dongen), 607.

Nucleic acid and protein metabolism in lymphoid cells, autoradiographic studies of.
I. Differences amongst members of the plasma cell sequence (Mitchell), 347.
II. The stability and actinomycin sensitivity of rapidly formed RNA and protein (Mitchell), 363.

Opsonic power of human anti-B serum for blood group B-active bacteria (Pavillard, Stegemann and Rowley), 62.

Opsonins, effect of, on phagocytosis and killing of salmonellae by *Amoeba proteus*, and the use of phage P_{22} to eliminate surplus extracellular bacteria (Savanat and Pavillard), 625.

Opsonins, the influence of, on intracellular killing, and the ability of *Amoeba proteus* to kill *Salmonella enteritidis* introduced by micro-injection (Savanat and Pavillard), 615.

Opsonins, the nature of the, in adult hen serum and developing chick embryos to certain gram-negative bacteria (Karthigasu, Jenkin and Turner), 499.

Pancreatic duct obstruction, enzyme changes in the plasma and peritoneal exudate of the rat following (Herriott and Palmer), 27.

Papillary muscle, rabbit, a quantitative description of the short term change in the force of contraction, with the pattern of stimulation (Johnson, Rowe and Vaughan), 197.

Phage patterns of the fast-growing acid-fast bacteria (Rodda), 457.

Phagocytic properties of peritoneal macrophages, effects of simple lipids on the.
II. Studies on the phagocytic potential of cell populations (Cooper and Houston), 429.

Phagocytic properties of peritoneal macrophages, effects of simple lipids on the.
III. Micro-electrophoretic and biochemical studies on triolein-treated cells (Lee and Cooper), 725.

Phagocytosis and its significance in leptospiral infection (Faine, Shahar and Aronson), 579.

Phagocytosis and killing of salmonellae by *Amoeba proteus*, effect of opsonins on, and the use of phage P_{22} to eliminate surplus extracellular bacteria (Savanat and Pavillard), 625.

Phenosulphonphthalein excretion, stop-flow analysis of, and visual localization of the site of maximal urine acidification in the rat nephron (Young and Edwards), 539.

Plasma and peritoneal exudate of the rat, enzyme changes in the, following pancreatic duct obstruction (Herriott and Palmer), 27.

Platelets in Glanzmann's disease, a morphological study of (Castaldi), 86.

Protein and nucleic acid metabolism in lymphoid cells, autoradiographic studies of.
I. Differences amongst members of the plasma cell sequence (Mitchell), 347.
II. The stability and actinomycin sensitivity of rapidly formed RNA and protein (Mitchell), 363.

Proteus strains, a modification of Sandys' medium for inhibiting the swarming of (Annear), 723.

Pulmonary damage due to high pressure oxygen breathing in rats.
V. Changes in the surface active alveolar lining (Jamieson and van den Brenk), 483.

Rabies virus, fixed, the development of, in mouse brain (Johnson and Mercer), 449.

Radio-protective drug (S-(2-amino ethyl) thiuronium bromide hydrobromide), the effect of a, upon the general and coronary haemodynamics and metabolism of the intact dog (Maxwell and Kneebone), 601.

Renal tubular function, stop-flow analysis of, in the rat undergoing osmotic diuresis due to creatinine loading (Young and Edwards), 667.

Reovirus, the ecology and epidemiology of (Stanley, Leak, Grieve and Perret), 373.

Reserpine, the peripheral effect of, on the blood vessels of conscious rabbits (Hopcroft), 635.

Salivas from A_1 and A_2 persons, inhibition of a human anti-A serum by (Boettcher), 703.

S. enteritidis cell walls, the effect of the growth rate on the composition of (Collins), 255.

Salmonella enteritidis introduced by microinjection, the ability of *Amoeba proteus* to kill, and the influence of opsonins on intracellular killing (Savanat and Pavillard), 615.

Salmonellae, the expression of heterophile antigenicity by (Collins and Rowley), 249.

Sandys' medium, a modification of, for inhibiting the swarming of *Proteus* strains (Annear), 723.

Serum, human anti-A, inhibition of a_1 by salivas from A_1 and A_2 persons (Boettcher), 703.

Serum, human anti-B, opsonic power of, for blood group B-active bacteria (Pavillard, Stegemann and Rowley), 62.

Simonsen phenomenon, quantitative aspects of the.
IV. Effect of immunisation to minor antigenic determinants (Warner and Szenberg), 100.

Sodium, potassium and urea, the effects of osmotic diuresis and vasopressin upon the distribution of, in the rat kidney (Cross), 523.

Streptococcus lactis folate activity of human liver tissue, studies on the (Joske, Davis and Kelly), 74.

Testosterone in biological fluids, the estimation of.
II. Testosterone in urine (Dulmanis, Coghlan, Wintour and Hudson), 385.

Thrombus formation *in vitro*: a rheological and morphological study (Rozenberg and Dintenfass), 109.

Thymic function, experimental studies of, in NZB mice and the F1 hybrids with C3H (Holmes and Burnet), 589.

Traumatic shock, the effect of, on metabolism of ethyl alcohol in mice.
II. Changes in whole-body metabolism (Lykke and Kosche), 181.

Tumour cells, Ehrlich ascites, the fate of Cr^{51} labelled (Vincent and Nicholls), 569.

Typhoid, mouse, the basis for immunity to.
I. The carrier state (Jenkin, Rowley and Auzins), 215.
II. Antibody formation during the carrier state (Turner, Jenkin and Rowley), 229.
III. Cell-bound antibody (Rowley, Turner and Jenkin), 237.

Urethane, the effect of, on mitotic cells of mice of different ages and strains (Wakonig-Vaartaja), 165.

Urine acidification in the rat nephron, visual localization of the site of, stop-flow analysis of phenolsulphonphthalein excretion and (Young and Edwards), 539.

Vascular permeability, the evaluation of increased, in the skin of guinea pigs (Carr and Wilhelm), 511.

Vasopressin and osmotic diuresis, the effects of, upon the distribution of sodium, potassium and urea in the rat kidney (Cross), 523.

Virus infections, arthropod-borne, in Queensland, studies of.
IV. Further serological investigations of antibodies to group B arboviruses in man and animals (Doherty, Carley and Gorman), 149.

THE GRIFFIN PRESS
